Mon March 18th from 1000-1400  
Presented by UZIEL Fighting Systems©

## UZIEL Fighting Systems©

Are hosting our next CQC course for Military personnel on:

Mon March 18<sup>th</sup> 2013 (Mississauga Armoury) 7535 Ninth Line Mississauga Ontario from 1000-1400

This course is restricted content for Military personnel only...

We will be covering combat ready fighting tactics which can be taken from the classroom and used in the field. Unlike most other companies, all of the tactics that your will learn CAN be used while wearing full kit with plates.

***\*This is not a Mixed Martial Arts (MMA) class of sports-fighting techniques\****

Our CQC is a no-nonsense approach to unarmed combat which takes into account high stress environments and the reality that you may be injured or have limited weapon options available to you.

This course will deal with environments which have restrictive space and how to gain a superior position against a skilled attacker. Anatomical weak spots will be explained in detail along with the physics of triangulation principles so that your throws and takedowns will have a high percentage of success.

We realize that due to busy schedules your training is often taking a backseat to other responsibilities. The purpose of this course is to fast track your learning with a gross-motor skill based program of tactics that are easy to learn and retain.

You will learn how a scientific based approach to fighting is the most efficient and practical methodology for anyone serving in the Armed Forces. Our CQC training is adaptable to your surroundings and multi-faceted. We understand your job and have created tactics that will seamlessly integrate into your current training.

**This 4 hour Course will cover the following material:**

**The science behind:**

- **Takedowns, Throws and Extractions**
- **Advanced Clinch Positions** ( An integral part of our new 2013 training program. Provides essential material for standing control positions)
- **Defense from Strikes and Kicks** ( This is an offensive approach which leads to takedowns or secure locks and finishing holds)
- **Advanced Edged Weapons** (Defensive and Offensive)

***Our curriculum is the end result of training Military/Police personnel over the last 15 years. We understand your job and more importantly the fact that your mobility is restricted due to all the equipment you're wearing. There are no "fancy" complicated locks or hard to remember techniques. Our system is based on the natural responses and biomechanics of the human body. The UZIEL Fighting System was designed for real world application and has been tested in combat.***

Date: Mon March 18th 2013

Time: 1000-1400
